EMPLOYMENT

2015-Present **CafePress**
Web Designer & Front/Back-End Developer

At CafePress, I have been given great opportunities to both excel at what I do best, and also challenged to learn new languages in-depth. I have done front-end design and development projects, such as designing and coding the front-end to the new 2016 CUP Tool, to working on a brand new, completely custom, modular and dynamic version of cafepress.com, utilizing C#, TypeScript and more.

2013-2015 **Humana**
Front-End Web Developer

At Humana, I mostly work in the Sitecore CMS, across many various web properties that Humana owns, utilizing Visual Studio for code changes. I also work in Teamsite for additional legacy websites that still need to be maintained. On the maintenance team, we work fast-paced and respond to any critical requests in a quick manner.

2011-2013 **RFX Technologies/GE Appliances**
Web/Graphic Designer & Front-End Developer

At RFX, I designed and coded custom mockups for many local businesses, and RFX's own website. I also contributed work on various back-end systems and scripts, utilizing the open-source CMS Bricolage. I would also alternate work for GE Appliances as a contractor, updating geappliances.com with maintenance updates and major redesigns, as well as other related web properties.

EDUCATION

2009-2011 **Sullivan College of Technology and Design**
Associates Degree in Graphic and Web Design

I also won 2nd place in the schools' scholarship award program, and was also on the Dean's list.
